

## AFTH.POLY300x300SAa

### Description

TGSI Tactile Hazard, 300x300mm Pad, Polyurethane, Flat Base with Self Adhesive Backing.

### Colour Options

Beige (BEI), Black (BLA), Blue (BLU), Grey (GRY), Red (RED), White (WHI), Yellow (YEL).

Colours shown are an approximation and may not fully represent the actual appearance of the product. Not all colours kept in stock. Lead time and minimum order quantities can vary.

### Specification

When specifying a colour, please add the three letter code for the colour at the end of the product code. For example: AFTH.POLY300x300SAa-**BLA** for Black

### Compliance

#### Slip Resistance

Wet pendulum test = P4

#### Design

All of our TGSI's have been designed to comply with AS1428.4.1-2009 "*Design for access and mobility - Means to assist the orientation of people with vision impairment - Tactile ground surface indicators*", when installed according to the standard.

### Surface Preparation

The surface must be fully cured, level, rigid, sound and free of cracks, holes or any other structural issue. Make sure the surface is dry, clean, and free of oil, grease, wax, paint, alkali, curing compounds, release agents, efflorescence, dust, concrete laitance, loose particles, or any other contaminants. When installing onto a metal substrate, it may be necessary to abrade the surface in order to create an adhesive key. On porous surfaces and outdoor or water-prone areas, we recommend that the surface be treated with a suitable surface primer or moisture barrier. After installation we recommend a sealant be applied onto the external edges to prevent ingress of water or contaminants.
